

Dear Valued Supplier,

MassMutual is in the process of optimizing our procurement software provided by SAP called Ariba. Effective Monday, November 14th, SAP Ariba will be used for all MassMutual Sourcing, Contracts, and Supplier Management.

Why Ariba?

MassMutual chose the SAP Business Network to increase competition and transparency with all third-party suppliers, as well as to improve controls and value for all stakeholders. To be considered for any new procurement opportunities with MassMutual, you must maintain a profile on the [SAP Business Network](#).

What is changing?

- Supplier information will be self-managed on the SAP Business Network. Once registered, you can make updates to details at any time. There will no longer be a need to reach out to MassMutual to request changes.
- New Sourcing events (including, requests for information, requests for proposals and invitations for bids) will be published and awarded on the SAP Business Network.
- Supplier Communication will be managed through the SAP Business Network, including maintenance of annual and quarterly assessments.

To become a part of the Ariba Supplier Network (ASN), please email
MMsupplierenablement@massmutual.com

If you have any questions, please contact [Ariba Procurement Support](#).

Regards,
MassMutual Procurement Team
